January 2019

Dear Arlington Families,

Recently, there has been a significant amount of press (e.g. Scholastic article) given to the problem of e-cigarette use, otherwise known as vaping, by young people across the country. We are always interested in partnering with parents in fostering a healthy lifestyle for our students. Accordingly, the intent of this communication is to provide parents and guardians with the latest information and resources available about this growing problem so that we can work together to stave off the threat to public health that e-cigarettes have become.

Thank you,

Paul M. Fanuele, Ed.D.
Executive Principal
